## (54) BENZOCYCLOHEPTENE DERIVATIVE AND ITS PRODUCTION

(57)Abstract:

PURPOSE: To provide a new compound having excellent bladder contraction suppressing action and useful as an agent for preventing and treating pollakiuria.

CONSTITUTION: The compound of formula I (R<sup>1</sup> is H, halogen or lower alkoxy; R<sup>2</sup> and R<sup>3</sup> are H, lower alkyl or lower alkenyl), e.g. cis-5-(2-thienyl)-7-diethylamino-6,7,8,9-tetrahydro-5H-benzocyclohepten-5-ol. The compound of formula I can be produced by reacting a carbonyl compound of formula II with a compound of formula III (M is alkali metal or MgX; X is halogen) optionally in the presence of a Lewis acid (e.g. stannic chloride) in a solvent (e.g. ether) under cooling or at room temperature. The compound is effective for the treatment and prevention of urination diseases of the lower urinary tract system (e.g. bladder and urethra) such as pollakiuria, bed-wetting, neurogenic bladder and incontinence of urine.

## LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision of rejection]

[Date of requesting appeal against examiner's decision of rejection]
